

I offer acupuncture treatments to address a wide range of conditions. Some of the common conditions include acute or chronic pain, digestive issues, sleep disturbances, emotional dysregulation, and musculoskeletal issues. Frequency of treatment can range from weekly to monthly depending on the issue. Duration of treatment session is about 1 hour.

Acupuncture is not a MSP covered benefit. Most extended medical benefits cover acupuncture. I am not able to offer direct billing for insurance coverage. A receipt will be issued at the end of treatment session.
